

HORSE SKIN CARE

EquiMud

By Pharma Naturalis

BECAUSE WE CARE!!!

Pharma Naturalis

-  Pharma Naturalis Ltd. is a dynamic & innovative company established in 2003.
-  The Company's plant is situated in the town of Arad near the Dead Sea.
-  Pharma Naturalis is solely focused on producing high quality 100% natural active ingredients Derma-cosmetic products for the treatment of various skin ailments for humans and animals.

Vet Gold Line by Pharma Naturalis

VET GOLD is the world's first ever Dead Sea Derma cosmetic range of products specifically developed for application on animals.

All VetGold products are based on 100% Natural Active Ingredients (NAI) with no medicinal ingredients, steroid free and antibiotic free.

Pharma Naturalis provides the VET GOLD line for animals in the following countries: Canada, Singapore, Spain, Switzerland, Italy, Hong Kong, Germany, Greece, Portugal, Baltic States, Benelux, Croatia, Finland, Poland, Hungary, Benelux, England, Slovenia, South Africa and Taiwan

BECAUSE WE CARE!!!

The Bedouin tribes of the Middle East have known the secret of the Dead Sea and the Yellow Head flower to treat their horses for swollen joints and ligaments as well as muscle aches, for thousands of years

Finally it is now available to
the equine world!!

BECAUSE WE CARE!!!

Equimud – The winning natural Formula

 EQUIMUD is a unique blend of natural oils and plant extracts with Dead Sea Mineral Mud, Steroid Free, Antibiotic Free and with Natural Active ingredients.

 Equimud is a strong and powerful mud dressing for horses to treat those aching joints, muscles and tendons and any inflammation that develops from vigorous riding and exercising.

 The product rejuvenates skin cells, healing wounds without “hyper granulation formations”, known as proud Flesh.

 A unique blend of mud, natural oils and plant extracts enriched with minerals from the Dead Sea that soothe, revitalize, rejuvenate and moisturize the skin as well as promoting muscle relaxation.

 Provides the skin with all the necessary components it needs to naturally regenerate itself and acts as a preventative protection against the development of sores and blisters.

Suitable for all horseback riding sports

The above sample was analysed using documented LGC methods for the presence of atropine, bufotenine, caffeine, dimethyltryptamine, hordenine, hyoscyne, methylbufotenine, morphine, theobromine and theophylline.

Result:
None were found.

SUBJECT: Equimud Trial Reports – India

Dear Nicky,

Good morning to you and your team.

Further to the subject matter we are pleased to inform that the trials of EquiMud were conducted very successfully at Delhi Race Course Club. Further, we are also giving a brief history on the trials, as below, primarily because, all these details are not usually mentioned in the final trial report.

Kindly find attached the details of the trials of EquiMud conducted in New Delhi Race Course Club by Col (Dr) R.S.Gupta.

1. Snaps of trial conducted on horse # 1 – Black Thunder which includes copies of Pre & Post Trial blood reports
2. Snaps of trials conducted on horse # 2 – Desert Falcon which includes copies of Pre & Post Trial blood reports
3. Snaps of trials conducted on horse # 3 – Escort Hunter which includes copies of Pre & Post Trial blood reports
4. Snaps of trials conducted on horse # 4 – Lady Shady which includes copies of Pre & Post Trial blood reports
5. Snaps of trials conducted on horse # 5 – Wings Of Law which includes copies of Pre & Post Trial blood reports
6. EquiMud Trial Report, as per observations conducted by Col: (Dr) R.S.Gupta at Delhi Race Course Club, India

We wish to keep you updated that, Horse # 1, 2, & 3 as mentioned above have responded very well and recovered completely after the use of EquiMud, and that the trainers and the trial conducting Vets are quite happy with the results of the product.

Horse # 4, Lady Shady, responded (more than) partially and recovery rate was assessed as 80%+.

This horse could have recovered completely if the application was continued for another 3 to 4 days.

The application could not be continued for another 3 to 4 days due to shortage of the product.

The trainer is happy with the product and is prepared to use this product on regular basis, and as and when required.

Horse # 5, Wings of Law, was a very chronic case and the problem of swelling and pain was persisting for more than 17 days from the day of application of EquiMud. This horse was on other treatment also, before EquiMud application but the problem could not be brought under control. Even then, some improvement in swelling was observed after EquiMud application for couple of days, which reversed later.

Finally it has been recommended by the Vets that EquiMud can be tried very successfully in other horses also on regular basis, as and when required and have also assured us that they (Delhi Race Course Club) can purchase this product if it is made available for commercial use.

The final and complete recovery was assessed at 80% +

We are confident of making good volumes with this product, and expect the ball to start rolling very soon, now.

Thanks for all the cooperation, and
With best regards,
T Puneet
Director, PBM (India)

Equimud Trial Report

BECAUSE WE CARE!!!

UK - Summary Report

by Elizabeth Newman Equine Consultant

-  The trial was very successful and demonstrated that the products were good for many
-  different conditions affecting horses. The trial included a wide cross section of horse owners
-  and trainers who were all impressed with results.
-  The extended trials have now been completed and all trainers were very happy they took part in it.
-  All of them liked both the Equimud and the Vet Gold Cream.

Feedbacks from horse owners

Very good for routine treatment after a workout or competition as a preventative measure

The infection in the hoof capsules has improved tremendously and the farrier is amazed at the progress.

Vet Gold Equimud was very popular and succeeded in treating various conditions

Following treatment there was a tremendous improvement in movement

Easy to apply and wash off, brushed off easily after, overnight treatment on Thoroughbred horses

How to use?
